EDUCATION

Vellore Institute of Technology

B. Tech. Computer Science Engineering in AIML - CGPA - 8.85/10

October, 2022 – Present

Madhya Pradesh, India

PROJECTS

Smart Bin Dimension Intelligence System | YOLO, SAM, OpenCV

May, 2026

- Developed a computer vision pipeline for warehouse smart binning and inventory allocation; ranked **Top 12 out of 35** teams in HackEasy, internal PharmEasy hackathon.
- Built and trained on a custom dataset of **61 manually labeled medicine package images** due to absence of pharmaceutical packaging subclasses in standard YOLO datasets.
- Integrated **YOLO, SAM, OpenCV contouring**, and **ArUco** calibration for automated real-world package dimension measurement and inventory allocation.

Multilingual Review Insights with RAG | RAG, FAISS, Transformers

November, 2025

- Implemented a **multilingual RAG pipeline** processing **200+** reviews, using **transformer-based NLP** and **embedding-driven FAISS retrieval** to generate department-specific next actions.
- Improved **output quality** by grounding LLM responses in retrieved SOP context, enabling reliable automation into business workflows.

Delivery Risk Intelligence Platform | Predictive Modeling, ML, Streamlit

September, 2025

- Developed a **predictive delivery risk model** using **multi-source logistics data** to score pre-dispatch delay probability.
- Enabled cost-aware dispatch decisions by selecting the best model via AUC-based comparison (**Random Forest AUC ~ 0.76**) and exposing **risk probability and expected delay cost** through a Streamlit dashboard.

INTERNSHIP

Pharmeasy

January, 2026 – Present

Analytics Intern - Warehouse Operations

Bengaluru, India

- Led incentive reporting for **4 warehouse operations teams** (pickers, rackers, auditors and verifiers) across **32 warehouses**, tracking productivity metrics for **1250+ associates** using fulfillment and throughput data.
- Optimized large-scale warehouse SQL workflows, reducing memory consumption by **200–300 GB** and query runtime by **30–40 minutes** through **query restructuring and join optimization**.
- Worked on smart binning and batch-mixing optimizations for **50K+ inventory units**, improving warehouse space utilization through multi-batch bin allocation.

TECHNICAL SKILLS

Programming & Platforms: Python (Pandas, Scikit-Learn, PyTorch), SQL, Hugging Face, Git

Machine Learning & GenAI: ML Algorithms, NLP, LLMs, Embeddings, RAG, Vector Databases

Analytics & BI: Statistical Analysis, EDA, Power BI (DAX), Tableau, Excel

EXTRACURRICULAR

DataVerse: Case Competition by KOED x IIM Lucknow

January, 2025 – February, 2025

Team Lead

Remote

- Designed executive-ready dashboards analyzing **INR 24.6M** in sales across **3,000 customers**, highlighting customer and revenue patterns.
- Uncovered seasonal and segment-level drivers influencing performance; solution ranked **Top 10 nationally** among **1,290+ teams**. National Finalist Certificate.
